What do You Consider to be the Most Important Features of New Development Downtown?

Please review the following list of potential features of a downtown redevelopment project. Then prioritize which features are most important to you. Many of the features on the list involve trade-offs, which are summarized below. Please review all of the trade-offs, then rank each item by entering a number one through ten in the boxes, with one being your highest priority and ten being your lowest priority.

You may only use each number once.

- **Community Character and Design**
  New downtown development should be of a high quality and designed to mirror downtown Livermore’s existing historic character.
  Trade-Off: High-quality design can add extra costs to new development.

- **Cultural Facilities**
  New downtown development should include cultural facilities such as a museum, a performance space, or an art gallery to enhance the character and vibrancy of downtown.
  Trade-Off: Cultural facilities will likely require City subsidy to construct and/or operate.

- **Hotel**
  New downtown development should include a high-quality downtown hotel to support Livermore businesses and the Livermore Wine Country.
  Trade-Off: Construction of a hotel will likely require a City financial subsidy.

- **Hotel Location**
  The location of a hotel (either on the east or west side of South Livermore Avenue) is a critical element of the overall site design.
  Trade-Off: Hotel developers and other interested parties may have their own ideas about specific advantages and disadvantages of a site located on either side of South Livermore Avenue.

- **Housing**
  New downtown development should include new housing to create vitality, support downtown businesses, and provide revenue to help reduce project costs for the City.
  Trade-Off: Provision of housing could reduce the area available for more other uses.

- **Open Space**
  New downtown development should include open space that provides community gathering places and enhances the character of downtown.
  Trade-Off: Open space can be costly to construct and maintain, and must have active monitoring to ensure it is safe.

- **Parking**
  New downtown development should include ample public parking close to all uses.
  Trade-Off: Public parking lots and structures can be costly to construct and maintain, and can act as a barrier between uses if not appropriately sited.

- **Public Finance**
  Downtown development should be affordable for the City to construct and minimize long-term City operating costs.
  Trade-Off: A costly downtown project could take funding away from other core City services.

- **Retail**
  New downtown development should include new retail uses to support an active, vibrant downtown.
  Trade-Off: Demand for new retail uses is limited under current market conditions, and new retail uses can create additional parking demand and generate additional peak hour traffic.

- **Traffic and Circulation**
  New downtown development should be designed to minimize generation of new traffic.
  Trade-Off: Limiting traffic impacts may restrict some uses such as retail and cultural facilities.
